

## NextGenAutomationTool Version 1.0

Appname: NextGenAutomationTool

Appid: 600056

Business Owner: [Raghavender Rao Gaddam](#)

System Owner: [Tribikram Tripathy](#)

AppShortName : NXTGEN

Environment: Dev

DL: -

- The application is an AI-assisted test automation platform. It allows users to create, manage, and execute automated test cases for internal web applications, store results in PostgreSQL, and generate execution reports. It also sends test steps and page context to an internal AI service to help generate and interpret automation actions during test execution.
- Validated: Yes
- Internal Server
- RTO/RPO: 24 hours.

### Ports:

Core Linux Sg

**443(HTTPS)**

5432(TCP)

### Tentative Cost Estimation:

\$130 USD Monthly for OnDemand Instance
